CAREER OBJECTIVE

A B.Tech CSE (AI) graduate with hands-on experience in software development and web technologies, seeking a Software Engineer role. Eager to contribute to innovative, scalable, and client-focused solutions by leveraging strong programming skills, adaptability, and a solid foundation in software engineering principles. Passionate about learning emerging technologies, collaborating in agile teams, and delivering high-quality applications that drive business value and digital transformation.

EDUCATION

Noida Institute of Engineering and Technology

B. TECH, Computer Science & Engineering (AI) – CGPA: 8.67

2023 – 2027

Deoria Senior Secondary School

Intermediate (CBSE Board)

2021 – 2022

High School (CBSE Board)

2019 – 2020

PROJECTS

ERP Management System (Team Project)

Nov 2025

Designed and developed a basic ERP Management System in a team environment, implementing database schemas and core CRUD operations for efficient data management.

Fake News Detection System (Course Project)

Oct 2025

Developed an NLP-based machine learning model using Python and Scikit-learn to classify news articles, applying text preprocessing and supervised learning techniques.

CERTIFICATIONS

AWS Certified Cloud Practitioner — (Amazon Web Services)

Jun 2026

Validated understanding of cloud computing concepts, AWS core services, security, pricing, and architectural best practices.

Principles of Generative AI — (Infosys Springboard)

Oct 2025

Strong understanding of generative AI principles, including large language models, prompt engineering, and ethical AI usage.

Object Oriented Programming using Python — (Infosys Springboard)

Aug 2025

Strong understanding of Object-Oriented Programming (OOP) concepts in Python, including inheritance and polymorphism.

TECHNICAL SKILLS

• Python

• SQL

• HTML — CSS — JavaScript

LANGUAGES KNOWN

Hindi: First language

English: Intermediate

French: Beginner

CO-CURRICULAR ACTIVITIES

Smart India Hackathon (SIH) — Participant

Sep 2025

Collaborated with a team to develop an innovative technology-based solution for a real-world problem under national-level competition constraints.

Technical Event Coordinator

Coordinated and managed multiple college-level technical events, handling planning, team coordination, and smooth execution with active student participation.

EXTRA CURRICULAR ACTIVITIES

AI EmergX – Technical Club Member

Engaged in organizing and supporting AI/ML workshops and learning initiatives, fostering hands-on technical skill development among students.

Kathpulia Theatre Club — Technical Team Member

Contributed to the technical operations of a college-level theatre club by supporting stage setup, audio-visual coordination, lighting management, and event logistics, ensuring smooth execution of rehearsals and live performances.
